For a breath OF ART

OBOE

My Reeds

For over fifty years we have been studying and realizing with care and attention handmade double reeds for oboe's family, English horn, basson's family, clarinet and sax.

Having a direct and continuous relation with music teachers, orchestra players and soloists, we are able to meet the needs of every concert performer or every musician at the beginning of his studies.

Our canes come from the south of France - Region of Var and Provence - to our workshop in Italy, and there they are worked by hand one by one, to obtain semi-finished products or high quality finished double reeds, which are well-known and appreciated all over the world.
